

KRISHNAJITH PATTIAMPULLY UTHAMAN

IT OPERATIONS MANAGER | INFRASTRUCTURE, CLOUD & BUSINESS APPLICATIONS

Dubai, UAE | +971 52 125 9119 | pattiampullykrishnajith@gmail.com | linkedin.com/in/krishnajith | Immediate Joiner

PROFESSIONAL SUMMARY

IT Operations and Infrastructure leader with 10.5 years of experience across the UAE and India, including six years as an IT Manager. Proven ability to oversee day-to-day technology operations across infrastructure, Microsoft Azure, Microsoft 365, business applications, security, vendors and IT projects. Experienced in leading teams of 6-15 engineers, maintaining system availability and operational stability, driving incident resolution and root cause analysis, and improving services through preventive maintenance, change management, documentation and continuous improvement.

Strong operational knowledge of Azure IaaS, Windows and Linux servers, virtualization, Active Directory and Microsoft Entra ID, Microsoft 365 administration, networking, firewalls, Wi-Fi, VPN, backup and disaster recovery, ServiceNow ITSM and enterprise vulnerability management. Effective bridge between business users, infrastructure teams, application developers and technology vendors, with experience coordinating ERP enhancements, testing, releases, deployments, audits and security remediation.

CORE COMPETENCIES

IT Operations Leadership | Infrastructure & Cloud Operations | System Availability & Performance | Incident, Problem & Change Management | Root Cause Analysis | Preventive Maintenance | Capacity Planning | Microsoft Azure | Microsoft 365 Administration | Windows & Linux Servers | VMware / Hyper-V | Active Directory & Microsoft Entra ID | Networking, Wi-Fi, VPN & Firewalls | Backup, Disaster Recovery & Business Continuity

Business Applications & ERP Support | SDLC Coordination | UAT, Release & Deployment Management | Vendor & SLA Management | IT Procurement & Asset Lifecycle | Project Coordination | Milestone, Risk & Progress Tracking | Cybersecurity & Vulnerability Remediation | Audit & Compliance Support | SOPs, Runbooks & Asset Registers | Stakeholder Management | Team Leadership

PROFESSIONAL EXPERIENCE

Field Engineer - Team Lead

Quess Corp Management Services | Deployed at Ministry of Education UAE, Dubai | Oct 2025 - May 2026

- Led 15 field engineers delivering day-to-day enterprise IT infrastructure and end-user operations across a large, distributed Ministry of Education environment.
- Maintained service availability and operational stability through SLA monitoring, incident prioritization, escalation management, onsite coordination and timely restoration of business services.
- Directed service transition and operational readiness activities, including support-model design, handover, knowledge transfer, training, SOPs, runbooks and knowledge-base documentation.
- Coordinated infrastructure, SCCM/Intune, service desk, network and security teams to resolve complex incidents, complete root cause analysis and implement preventive actions for recurring issues.

Senior System Engineer - Azure & Hybrid Infrastructure Operations

Onward Technologies | Client: Caterpillar | Chennai, India | Oct 2021 - Aug 2025

- Led an eight-member technical team supporting enterprise Azure and hybrid infrastructure operations, assigning priorities, reviewing work, managing escalations and ensuring adherence to SLAs, SOPs and operational standards.
- Managed day-to-day Azure operations covering virtual machines, virtual networks, network security groups, resource groups, storage accounts, backup services, Azure Monitor, Log Analytics and Microsoft Entra ID.
- Monitored infrastructure health, availability, performance and capacity; coordinated troubleshooting, service restoration, root cause analysis and preventive actions for recurring cloud and on-premises issues.
- Coordinated Azure VM provisioning, access management, backup validation, disaster recovery readiness, cloud migration support, cutover planning, testing and post-migration validation.
- Supported Microsoft Entra ID administration, including users, groups, Azure RBAC, MFA, Conditional Access, privileged-access reviews and least-privilege governance.
- Managed ServiceNow incident, problem, change and vulnerability workflows, including assignment, escalation, SLA tracking, CAB coordination, risk exceptions, closure validation and executive reporting.
- Led vulnerability-management coordination across 10,000+ Azure, on-premises and OT assets using Qualys VMDR and ServiceNow, achieving approximately 95% remediation SLA compliance and contributing to a 30% reduction in critical vulnerabilities.
- Improved remediation timelines by approximately 25% through risk-based prioritization and structured stakeholder follow-up; supported Qualys-ServiceNow workflow automation that reduced manual effort by approximately 35%.

IT Manager

Itan Jewels DMCC | Dubai, UAE | Aug 2015 - Aug 2021

- Directed end-to-end day-to-day IT operations for a mid-sized jewellery manufacturing and trading organization, leading a six-member team across infrastructure, service desk, networking, security, business applications and vendor support.
- Maintained high availability, performance and operational stability of 10+ physical servers and VMware/Hyper-V workloads supporting Active Directory, file services, databases, ERP and other business-critical applications.

- Managed Windows and Linux servers, Microsoft 365, Active Directory, Microsoft Entra ID, patching, configuration, preventive maintenance, monitoring, capacity planning, RBAC, MFA and Conditional Access support.
- Managed LAN/WAN, Wi-Fi, VLANs, VPNs and perimeter security using Fortinet and SonicWall firewalls, improving secure connectivity for offices, remote users and business systems.
- Established backup, disaster recovery and business continuity processes using Acronis, including backup monitoring, restoration validation, recovery procedures and documentation.
- Led ERP implementation and continuous business-application support, coordinating requirements, priorities, bug fixes and enhancements between finance, production, inventory, sales, business users and external developers/vendors.
- Applied SDLC and change-management practices to application updates through impact assessment, testing, UAT, release scheduling, deployment, rollback readiness and post-release support for SQL Server-backed ERP systems.
- Managed technology vendors and support partners, monitored SLAs and service quality, coordinated escalations, and handled contracts, licensing, procurement, warranty and IT asset lifecycle activities.
- Delivered hybrid Azure integration, ERP rollout, server upgrades, network improvements and security projects; tracked milestones, dependencies, risks, progress, documentation and stakeholder reporting.
- Strengthened security and governance through firewall controls, endpoint protection, patch and vulnerability remediation, access reviews, asset registers, IT policies, SOPs, audit support and management reporting.

TECHNICAL SKILLS

Cloud & Microsoft: Microsoft Azure (VMs, VNets, NSGs, Resource Groups, Storage, Backup, Azure Monitor, Log Analytics), Hybrid Cloud, Microsoft 365 Administration, Microsoft Entra ID, Azure RBAC, MFA, Conditional Access, Intune, SCCM

Infrastructure & Virtualization: Windows Server, Linux, Active Directory, Group Policy, DNS, DHCP, VMware, Hyper-V, Server Patching, Performance Monitoring, Capacity Planning, Backup and Disaster Recovery

Network & Security: Fortinet, SonicWall, LAN/WAN, Wi-Fi, VLAN, VPN, Network Segmentation, Endpoint Security, Qualys VMDR, Vulnerability Remediation, CIS Benchmarks, ISO 27001 and Audit Support

Applications & Service Management: ERP and Business Applications, SQL Server-backed Application Support, SDLC Coordination, UAT, Release and Deployment Management, ServiceNow ITSM, Incident, Problem, Change, CAB, RCA, SLA Reporting

Projects, Vendors & Productivity: Vendor Management, Procurement, Licensing, Asset Lifecycle, RAID and Milestone Tracking, SOPs, Runbooks, Knowledge Bases, Executive Reporting, ChatGPT, Microsoft Copilot and Gemini productivity tools

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Microsoft Certified: Azure Security Engineer Associate (AZ-500) | Certified Ethical Hacker (CEH) - EC-Council, 2022

Qualys: VMDR, CyberSecurity Asset Management, Patch Management, Reporting Strategies and Scanning Strategies

ISO 27001:2022-Compliant Cybersecurity | Strategies for Effective Leadership Teams | AI for Organizational Leaders - Microsoft and LinkedIn

EDUCATION

Master of Computer Applications (MCA) - Bangalore University, 2014 | Bachelor of Computer Applications (BCA) - Bharathiar University, 2011
