

KRISHNAJITH PATTIAMPULLU UTHAMAN

IT Manager | Azure Security Engineer | Vulnerability Management & IT Operations Lead

Phone: +971 521259119 | **Email:** pattiampullukrishnajith@gmail.com | **LinkedIn:** [linkedin.com/in/krishnajith](https://www.linkedin.com/in/krishnajith)

Languages: English | Hindi | Malayalam | Tamil

Location: Dubai, UAE | Immediate Joiner

Profile Summary

Cybersecurity, Azure Security, and IT Operations professional with 10.5 years of experience across UAE and India delivering enterprise-scale security operations, identity and access management, vulnerability management, and hybrid cloud infrastructure support.

Experienced in Microsoft Azure security administration, Microsoft Entra ID (Azure AD), Qualys VMDR, and endpoint security, with strong focus on risk reduction, compliance, and enterprise security governance.

Previously led IT Field Engineering operations in a Ministry of Education UAE environment, managing 15 engineers and driving ITIL-aligned service transition, operational readiness, and enterprise service delivery.

Strong expertise in securing hybrid cloud and on-premises environments through Zero Trust architecture, IAM governance, and risk-based vulnerability management, improving security posture, resilience, and service reliability across distributed systems.

Core Competencies

Azure Cloud Security | Vulnerability Management | SOC & Security Operations | SIEM & Threat Hunting | Incident Response | Entra ID & IAM | Endpoint Security | Windows & System Hardening | Network Security | Application Security | OT Security | ISO 27001 & NIST CSF | Security Project Management | Team Leadership | Stakeholder & Vendor Management

Technical Skills

- **Vulnerability Management:** Qualys VMDR, Rapid7 InsightVM, Tenable Nessus, ServiceNow VR, CVSS, CVE Prioritization, Remediation, Exceptions
- **Security Operations:** SOC L2, Microsoft Sentinel, SIEM Alert Investigation, Threat Hunting, Incident Response, IOC Analysis, EDR, MITRE ATT&CK, KQL
- **Microsoft Security:** Defender XDR, Defender for Endpoint, Defender for Cloud, Entra ID, Conditional Access, MFA, PIM, Identity Protection
- **Cloud Security:** Microsoft Azure, Hybrid Cloud, Azure Firewall, NSG, RBAC, Key Vault, Azure Policy, Log Analytics
- **Infrastructure Management:** Windows Server, Active Directory, DNS, DHCP, Group Policy, VMware/Hyper-V, Backup & DR, Patch Management, Server & Endpoint Administration
- **Endpoint & OT Security:** Intune, SCCM, Nozomi Networks, Endpoint Compliance, Device Hardening
- **Network & Application Security:** Fortinet, SonicWall, VLAN, VPN, Nmap, Wireshark, Burp Suite, OWASP ZAP, OWASP Top 10
- **Governance & ITSM:** ISO 27001, NIST CSF, ITIL, ServiceNow, Incident Management, RCA, SLA/KPI Management, Risk & Compliance
- **Leadership & Management:** Team Leadership, Stakeholder Management, Vendor Management, Service Delivery, Project Coordination, Escalation Management, Executive Reporting
- **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Decision Making, Collaboration, Customer Focus, Time Management

Certifications & Professional Courses

- Microsoft Certified: Azure Security Engineer Associate (AZ-500)
- Microsoft Certified: Identity and Access Administrator Associate (SC-300)
- Microsoft Certified: Cybersecurity Architect Expert (SC-100)
- Certified Ethical Hacker (CEH) – EC-Council, 2022
- Vulnerability Management Detection and Response (VMDR)
- ISO 27001:2022-Compliant Cybersecurity - LinkedIn
- Strategies for Effective Leadership Teams – LinkedIn
- AI for Organizational Leaders by Microsoft and LinkedIn

Education

- Master's Degree in Computer Applications – Bangalore University, 2014
- Bachelor's Degree in Computer Applications – Bharathiar University, 2011

Organizational Experience

Field Engineer-Team Lead

Quess Corp Management Services - Dubai, UAE

Deployed at Ministry of Education UAE (Project by TCS & e&)

Oct 2025 – May 2026

- Led a team of 15 Field Engineers supporting endpoint security, identity access, device compliance, vulnerability remediation, and secure EUC operations across a large-scale Ministry of Education environment.
- Directed endpoint security operations using SCCM and Intune, coordinating patch compliance, secure configuration, device hardening, software deployment, access control, and remediation of non-compliant endpoints.
- Managed security-related incidents and escalations involving malware alerts, account access issues, suspicious endpoint activity, policy violations, and vulnerability findings, coordinating resolution with SOC, infrastructure, network, and security teams.
- Established ITIL-aligned security workflows, SOPs, runbooks, escalation procedures, and knowledge documentation to strengthen incident response, endpoint compliance, remediation tracking, and operational security governance.

Senior System Engineer

Onward Technologies - Chennai, India

Client: Caterpillar.

Oct 2021 – Aug 2025

- Led the enterprise Vulnerability Management program across 7,000–10,000+ IT and OT assets, managing vulnerability identification, risk prioritization, remediation planning, validation, exception management, and closure across infrastructure, application, network, endpoint, and OT environments.
- Managed an 8-member security team and coordinated with SOC L2, infrastructure, application, network, endpoint, business stakeholders, and vendors to remediate Critical and High vulnerabilities within defined SLA and KPI targets.
- Oversaw vulnerability management using Qualys VMDR, Rapid7 InsightVM, Tenable Nessus, ServiceNow Vulnerability Response, and Nozomi Networks, integrating vulnerability intelligence with SIEM alerts, EDR telemetry, threat intelligence, IOCs, CVEs, asset criticality, and exploitability data.
- Collaborated with SOC L2 teams on SIEM alert investigation and threat hunting, correlating vulnerable assets with security events, validating indicators of compromise, identifying active exploitation, and mapping suspicious activity to MITRE ATT&CK techniques.
- Coordinated the end-to-end workflow from SIEM alerts → threat hunting → incident investigation → containment → vulnerability remediation → validation and closure, while managing risk exceptions, SLA breaches, remediation blockers, risk acceptance, and escalations through ServiceNow.
- Delivered executive dashboards and governance reporting covering vulnerability posture, SOC-linked incidents, remediation progress, aging, trends, and outstanding risks, achieving approximately 95% SLA compliance, 30% reduction in Critical vulnerabilities, and 25% improvement in remediation timelines, while supporting ISO 27001, NIST CSF, audit, risk, and compliance requirements.

IT Manager

Itan Jewels DMCC | Dubai, UAE

Aug 2015 – Aug 2021

- Led an 8-member IT infrastructure and cybersecurity team supporting 500+ users, 10+ servers, enterprise networks, ERP applications, endpoints, and Microsoft 365, maintaining 99.5% service availability.
- Directed Windows Server and Active Directory security governance, including GPO hardening, privileged-access reviews, password controls, audit logging, patching, and periodic user and group access reviews.
- Managed network security and vulnerability assessments using Fortinet, SonicWall, Nmap, Nessus, Wireshark, and OpenVAS, covering firewall rules, VLANs, VPNs, exposed ports, services, and configuration weaknesses.
- Oversaw web application and ERP security assessments using Burp Suite, OWASP ZAP, Nikto, Nmap, and Nessus, addressing OWASP Top 10, authentication, authorization, session security, TLS, and application misconfigurations.
- Established system-hardening and endpoint-security standards across Windows servers and workstations, achieving approximately 95% patch compliance and reducing high-risk security findings by 30%.
- Led hybrid-cloud and secure remote-access initiatives, migrating 5+ workloads to Microsoft Azure while strengthening MFA, VPN, identity controls, firewall policies, least privilege, and administrative access.
- Governed security incidents, vulnerabilities, remediation actions, vendor risks, RCA, exceptions, and management reporting, improving remediation efficiency while maintaining SLA compliance and operational resilience.
